COMPOSITE BUILDING MATERIALS
2024 PRODUCT GUIDE

THE SYLVANIX ADVANTAGE

Enjoy the beauty of natural wood with the enhanced benefits and superior performance of Sylvanix decking:

- Low Maintenance
- No Painting, Sanding, or Staining
- No Splinters, Cracks, or Warping
- Will Not Cup or Crown
- Impervious to Insects
- Rot, Mold, and Mildew Resistant
- Anti-fade and Stain Technology
- 360° Encapsulated Protection

elitecollection™

Deep embossed wood grain with visual and textural differences you can see and feel. The dual-colored, reversible boards are available in ten woodtone colors.

*Elite Collection in
Chocolate / Mesa Brown*

skylineseries™

Two distinct finishes on reversible boards for a choice of textures and aesthetics. Skyline Series is available in two earthtone colors.

ARCHITECTURAL FINISH

TRADITIONAL FINISH

*Skyline Series
in Graphite*

destinations™

Lightweight scalloped profile for reduced weight without sacrificing strength and durability. Available in three rich colors with dynamic streaking and realistic grain finish.

*Destinations
in Sandpoint*

elements™

Thanks to its lightweight profile, Elements is easier to handle and install. Elements is available in four traditional colors with multi-hued streaking and an authentic wood grain pattern that captures the beauty of tropical hardwoods.

*Elements
in Coastal Mist*

OUR COMMITMENT TO SUSTAINABILITY

Sylvanix is a leading innovator in the development and manufacturing of eco-friendly, advanced composite materials. We are committed to protecting and conserving the natural resources that connect us as a global community. That is why Sylvanix decking is:

- Made with 90% Recycled Content
- Contains No Harmful Chemicals or VOCs
- Contains No Virgin Timber
- Made with Post-consumer Recycled Plastic and Recycled Eucalyptus Wood Fiber
- Produced Using a Water & Energy Conserving Closed Loop Manufacturing Process

Learn more about Sylvanix Decking's commitment to the environment at sylvanix.com/who-we-are.

elitecollection™

- 360° shield for unparalleled performance & weather resistance
- Low-maintenance — never needs painting or staining
- Dual sided boards with two colors in natural, multi-tonal hues
- Authentic look and feel of wood grain on both sides
- 90% recycled content, environmentally sustainable
- Brushed finish for reduced sheen and enhanced traction
- Available in 10 colors spread across 5 boards

Elite Collection decking is available in five complementary color pairings on dual-color boards providing a harmonious palette of nature-inspired greys and browns. Both sides are embossed with intricate wood grain details for an authentic look and a more natural feel underfoot. **Elite Collection** reversible boards are the perfect solution for homeowners and builders that want an eco-friendly, low-maintenance alternative to hardwood decking.

READY TO BUILD YOUR DECK?

No matter where you are in the process of creating your Sylvanix deck, we're here to help. Visit us online at Sylvanix.com to download installation guides, technical resources, and get answers to commonly asked questions. You'll find everything you need to know including information on our warranties and where to find samples of our decking.

HIDDEN FASTENER INSTALLATION OVERVIEW

Step 1: Install first Sylvanix deck board. Pre-drilling is required using a 1/8in (3.2mm) countersinking drill bit for all face fastener installations.

Step 2: Position the hidden fasteners.

Step 3: Install first hidden fastener.

Step 4: Complete installation of boards.

FASTENER OPTIONS

Sylvanix Hidden Fasteners

by Black Talon **SYLVANIX**
outdoor products inc.

- Sylvanix Hidden Fasteners are Stainless Steel Clips.
- Standard Clips have legs that fit over a joist to make use of the Clip easier
- Angled Clips sit on top of a joist when using the Standard Clip isn't an option
- Boxes of Clips include enough clips and screws to cover 100 square feet. (With joist running 16" on center)
- Buckets are Clips include enough clips and screws to cover 600 square feet. (With joist running 16" on center)

Sylvanix Plug Kits

by **STARBORN.**

- Sylvanix Plug Kits are available in the Sylvanix Elite Collection Only
- All 10 colors are available for purchase (Aspen Gray, Lake Gray, Mesa Brown, Chocolate, Harvest Brown, Tropical Gold, Cherrywood, Merlot, Sand Dune, Summit Gray)
- Sylvanix Plug Kits vary in size and type (Stainless Steel or Epoxy).

Please refer to your local vendor for availability

Color Match Screws

by **STARBORN.**

- Color match screws are available in a stainless steel option or epoxy coated option depending on your market.
- Please refer to your local vendor for availability.

CARE & MAINTENANCE

Washing We recommend washing Sylvania Products with soapy water and a soft-bristle brush. If you choose to use a power washer, please take proper safety precautions and follow the following instructions. Along with an appropriate cleaning product, you should ensure to spray in the direction of the grain of the boards and use a fan tip nozzle. At all times the nozzle should be held at a minimum of 6 inches above the surface of the product with a maximum force of 1500psi. Please note, the user assumes all responsibility for any damage caused by using a pressure washer.

Dirt & Grime Maintaining a clean, dry surface is the best method for combating dirt, grime and mildew build up, where a periodic cleaning is all that maybe required. Even though Sylvania products are formulated to inhibit mildew growth and staining, mildew stains can occur where moisture and dirt or pollen is present.

Spots & Stains Many stains can be cleaned with soap or household degreasing agent and warm water. Scrub and soak the affected area as soon as the stain occurs to ensure best results, then rinse off with warm water. For more stubborn stains we recommend using a composite specific cleaner for more effective stain removal.

Scrapes & Scratches Surface scratches and abrasions will fade after weathering. However, scrape and scratch marks can be eliminated by using a soft brass bristled brush. Simply brush in the direction of the grain on the product until the mark is gone.

Snow Removal For snow removal, we recommend always using a plastic blade shovel so that you don't scratch your deck. To aid in the shovel not catching on board edges, try to shovel the snow in the same direction as your deck boards. For light dustings or fluffier snow, we suggest simply brushing it away with a broom. For melting snow, we recommend ice melt that is approved for use on concrete, such as Calcium Chloride or Magnesium Chloride.

PRODUCT FAQs

We've provided answers to a few of the most common questions we get asked. Read more product FAQs, learn more about Sylvanix Decking, and access warranty information, installation guides, and additional product literature on the Resources page of the Sylvanix Outdoor Products website at www.Sylvanix.com.

HOW IS SYLVANIX DIFFERENT FROM OTHER COMPOSITE DECK BOARDS?

Some companies cap only the top or top and bottom of their deck boards, but Sylvanix decking is fully capped. Both our grooved and square edge boards have a four-sided, specially engineered polymer coating that creates an impervious 360° shield around each board, for superior protection and strength. Sylvanix also offers the industry's first dual-color deck board (in our Elite Collection) as well as decking with dual finishes (in our Skyline Series decking). In addition, our Destinations line of decking features a scalloped profile that reduces both cost and weight without sacrificing performance. And for complete installation flexibility, all Sylvanix deck boards are warranted for use with any universal hidden fastener system.

WHERE DOES THE RECYCLED PLASTIC & WOOD USED FOR SYLVANIX PRODUCTS COME FROM? One of the great strengths of Sylvanix is our commitment to sustainability and protecting our planet. All Sylvanix

products are made using recycled plastic and recycled wood. The plastic used in our products is a sustainable material known as HDPE (high-density polyethylene) which is made from recycled post-consumer plastics.

Some commonly recycled items which end up in Sylvanix products because of our use of recycled HDPE include milk bottles, food and cosmetics containers, and grocery bags. The wood in our products is post-manufacturing Eucalyptus hardwood that has been collected to help create our beautiful decking.

WHAT IS THE CAP OF A DECK BOARD AND WHAT IS IT MADE OUT OF?

The cap of a deck board is the protective exterior layer of the board. Some boards only have a cap on one or two sides but Sylvanix decking is capped on all four sides (except for the cut sides of the board which expose the core of the board). The cap of Sylvanix decking is made of a high grade polymer plastic and is co-extruded with the board to completely encapsulate it (including the groove) for unparalleled performance and long-lasting aesthetics.

DOES SYLVANIX HAVE RISER AND FASCIA BOARDS?

Yes, Sylvanix has a complete product offering for Elite Collection, Skyline Series, and Destinations with riser and fascia boards available. With our riser and fascia boards, the boards are not finished on both sides as only one side needs to be exposed for their use.

WHAT IS THE RECOMMENDED JOIST SPACING?

Recommended joist spacing depends on your particular application. In most residential applications, Sylvanix decking will be installed 16" on center when your deck board is 90° or perpendicular to your joist. If your Sylvanix decking is running on a 45° angle, you will install your Sylvanix decking 12" on center. For more detailed information on installing Sylvanix deck boards, please refer to our Installation Guide.

WHAT IS THE WARRANTY FOR SYLVANIX DECKING?

All Sylvanix decking lines are covered by our industry-leading 25-year stain & fade warranty as well as a limited 25-year performance warranty for residential and limited 10-year performance warranty for commercial.

Experience the look and feel of a traditional hardwood deck without all of the negative environmental impact and time-consuming maintenance.
